3DHistech Pannoramic Slide Scanners

3DHistech Pannoramic 1000

3DHistech's Pannoramic™ 1000 is an end-user friendly, fast, and efficient slide digitalization system. Its 1000-slide capacity and robust design offer a reliable solution for high-volume whole-slide imaging.

• Ability to load up to 1000 standard slides at once

• Double width slide options for mixed standard and double width slide scanning at the same time

• Fully automatic loading and imaging reduces time in-between scans for high throughput

• Robust granite base reduces vibration artifact giving superior image quality

• Dual slide stage enables scanning and exchanging slides at the same time increasing work flow

• Heavy duty construction for high slide volume use

• Low maintenance design allowing a walk-a-way implementation

• STAT options to prioritize which slides get scanned first

• Rapid loading of slide holders without slowing throughput

• Preview samples for defined protocols while routine slides scan

• Two objectives exchangeable automatically during scanning for routine and high magnification demands

• 1D and 2D barcode reading and parsing

• Automated tissue detection and automated coverslip detection eliminate scanning non-sample areas

For research and education uses only, not for use in diagnostic procedures
